

5KW solar module price

Overview

On average, a 5 kW solar panel system costs \$13,550, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state.

On average, a 5 kW solar panel system costs \$13,550, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state.

Technology Choice Impacts Long-term Value: While string inverter systems offer the lowest upfront costs (\$11,000-\$12,500), microinverter systems (\$13,800-\$15,000) provide superior performance in shaded conditions and typically include 25-year warranties versus 10-15 years for string inverters. DIY.

A 5-kW residential solar array is the entry point for many small to average homes that want to offset a meaningful share of daytime use without covering every inch of roof. Installers quote two ways, price per watt and an all-in turnkey total that bundles gear, labor, permits, overhead, and margin.

A 5 kW solar panel system is enough to power a small home—but it'll cost you about \$13,550. Why trust EnergySage?

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make.

Compare price and performance of the Top Brands to find the best 5 kW solar system with up to 30 year warranty.
