

5g communication equipment energy storage cabinet base station stocks

Overview

How big is the 5G base station equipment market?

The 5G base station equipment market is estimated to reach US\$52.733 billion by 2030 from US\$29.865 billion in 2025, growing at a CAGR of 12.04%. 5G base stations form the backbone of next-generation wireless networks, enabling enhanced bandwidth, ultra-low latency, and broader coverage to support rising connectivity demands.

Which stocks are best positioned for 5G?

Semiconductor companies, manufacturers of mobile tech equipment and infrastructure, and real estate asset holders are some of the best-positioned stocks to benefit from the proliferation of 5G. The basic building blocks for 5G are semiconductors -- the electronics that process data and execute commands in a computing system.

Where does 5G data come from?

Before it gets turned into a high-speed Wi-Fi signal, 5G data needs to travel along the wired portion of the internet, just like other electronic data. That's where fiber-optic cable comes in, and Corning (GLW 2.36%) -- the legacy glass and ceramics manufacturer -- is a major supplier.

Who makes 5G chips?

The basic building blocks for 5G are semiconductors -- the electronics that process data and execute commands in a computing system. These companies provide the chips that make 5G work. Top chip companies include: Data as of Oct 08, 2025. 1. Broadcom Chip design giant Broadcom (AVGO 2.67%) is a top name in 5G.
