

# Acceptance Specifications for Communication Engineering Base Stations

## Overview

---

3GPP defines 3 different base station (BS) types: BS types 1C - conducted, 1H - hybrid, 1O - OTA for FR1 and 2O - OTA for FR2. For BS type 1C and 1H the 3GPP base station conformance testing specification TS 38.141-1 applies. TS 38.141-2 is applicable to 1H, 1O and 2O BS types.

3GPP defines 3 different base station (BS) types: BS types 1C - conducted, 1H - hybrid, 1O - OTA for FR1 and 2O - OTA for FR2. For BS type 1C and 1H the 3GPP base station conformance testing specification TS 38.141-1 applies. TS 38.141-2 is applicable to 1H, 1O and 2O BS types.

In case of any existing or perceived difference in contents between such versions and/or in print, the prevailing version of an ETSI deliverable is the one made publicly available in PDF format on ETSI deliver repository. Users should be aware that the present document may be revised or have its.

With the assignments of the spectrum in the 3.3 GHz, 3.5 GHz, 4.9 GHz and 26/28 GHz bands<sup>1</sup> to mobile network operators, the fifth generation mobile (5G) services have been commercially launched in Hong Kong since April 2020. The NR base stations are now certified using several type acceptance.

Base station (BS) performance is vital for delivering expected quality of experience to end users. To ensure this, it is important that the base station conformance criteria is met and that they fulfill the requirements in the region in which they operate. These criteria are specified by the mobile.

The procurement, testing and deployment of base station antennas – a critical component in the delivery of mobile communications – will be simpler for operators and suppliers thanks to new guidance for the creation of a ‘common language’ to describe the technology. For the first time, the mobile.

Communication Green Base Station Acceptance Specifications Page 1/9 Solar Storage Container Solutions Communication Green Base Station Acceptance Specifications Powered by Solar Storage Container Solutions Page 2/9 Overview  
What is a green base station solution?

The green base station solution.

Consumers, businesses and industry more than ever require mobile connectivity that is secure, reliable and of high-quality. The radio link between the device and the network is a critical factor in realising these performance needs. Our latest “Recommendation on Base Station Active Antenna System. What are the acceptance procedures for radio network equipment?

This document describes Siemens' acceptance procedures for radio network equipment, including base transceiver stations, base station controllers, node Bs, RNCs, and microwave links. It outlines a multi-stage testing process including factory acceptance, system acceptance, unit acceptance, cluster acceptance, and network acceptance.

What are base station active antenna system standards?

Our latest “Recommendation on Base Station Active Antenna System Standards” provides the industry with an updated set of parameter definitions, measurement methodologies and reporting processes. This enables a uniform way to describe the electrical and mechanical characteristics of the network side of the radio link (the “base station antenna”).

How are NR base stations certified?

The NR base stations are now certified using several type acceptance criteria including TAC 0052, TAC 0073 and TAC 0114, which draw reference to the relevant specifications published by the 3rd Generation Partnership Project (“3GPP”) as follows for selected test items to ensure efficient use of radio spectrum and to avoid harmful interference –.

What are 3GPP base station conformance testing requirements?

We start with a quick overview of 3GPP base station conformance testing requirements. 3GPP defines the radio frequency (RF) conformance test methods and requirements for NR base stations in the technical specification TS 38.141, which covers transmitter (Tx), receiver (Rx), and performance (Px) testing.

## Acceptance Specifications for Communication Engineering Base Station

### Ensure Your Base Station Transmitter Complies with 5G NR ...

Thanks to the much faster, more reliable, and near-instant connections that come with the 5G, we now see a variety of innovative and comprehensive mobile wireless communication ...
