

All-vanadium liquid flow battery vehicle

Overview

The vanadium redox battery (VRB), also known as the vanadium flow battery (VFB) or vanadium redox flow battery (VRFB), is a type of rechargeable which employs ions as . The battery uses vanadium's ability to exist in a solution in four different to make a battery with a single electroactive element instead of two.

OverviewHistoryAttributesDesignOperationSpecific energy and energy densityApplicationsDevelopment

The vanadium redox battery (VRB), also known as the vanadium flow battery (VFB) or vanadium redox flow battery (VRFB), is a type of rechargeable flow battery which employs vanadium ions as charge carriers. The battery uses vanadium's ability to exist in a solution in four different oxidation states to make a battery with a single electroactive element instead of two.
