

Bahrain Industrial and Commercial Energy Storage Product Cooperation Model

Overview

What is a battery energy storage system (BESS)?

Since the mid of 2020s, battery energy storage systems (BESS) emerged as a solution for providing fast firming. The United Kingdom has recognized energy storage as a solution to further increase the integration of renewable energy sources.

How can governments support energy storage development in the GCC region?

The governments in the GCC region could collaborate with energy storage developers to introduce favorable regulations and provide capital investments to support the development of a utility-scale energy storage market and eliminate the financing risk and uncertainty factor for the projects by providing long-term contracts through auctions.

How can the GCC promote the development of Bess?

By making changes to the existing electricity model, the GCC region can effectively promote the development of BESS and tap into its potential benefits such as lowering the share of fossil-fuels-based power plants in providing grid balancing services.

Bahrain Industrial and Commercial Energy Storage Product Cooperati

Role of Energy Storage

The use of electricity from renewable energy plus battery energy storage systems can help in meeting the peak demand with clean energy instead of using fossil-fuel-based power plants.
