

Battery Cabinet Cooperation

Overview

Which battery energy storage projects are under review by the CEC?

Three stand-alone battery energy storage projects are currently under review by the CEC: the Corby BESS project in Vacaville, the Compass Energy Storage Project in San Juan Capistrano, and the Potentia-Viridi Battery Energy Storage System in Alameda County. According to the CEC's website.

Should battery energy storage projects be fully enclosed?

Others, like the City of Moorpark, have adopted difficult-to-meet standards such as requiring that all battery energy storage projects be fully enclosed in a building. Kern County is imposing large setbacks on new battery energy storage projects.

Why do we need a backup battery cabinet?

Through cutting-edge research and innovation, advanced engineered power products for backup battery cabinets have become essential to our energy future. When the power goes out, battery backups ensure that the Internet, cloud-based data, financial and health records stay accessible.

Can a battery project be a stand-alone battery storage project?

In addition, several battery developers have filed applications with the California Energy Commission (CEC) for stand-alone battery storage projects under the opt-in provisions of AB 205. Eligible storage projects must be capable of storing 200 megawatt-hours (MWh) or more.
