

Battery Energy Storage Factory Construction Plan

Overview

With the new battery manufacturing complex in the southwestern state, LGES will boost its production capacity in major product segments, develop more cohesive partnerships with its customers in both EV and ESS sectors, and cut back on the logistics cost by bringing its new manufacturing.

With the new battery manufacturing complex in the southwestern state, LGES will boost its production capacity in major product segments, develop more cohesive partnerships with its customers in both EV and ESS sectors, and cut back on the logistics cost by bringing its new manufacturing.

Today there are about 34 battery factories either planned, under construction, or operational in the country. Former U.S. President Joe Biden's Inflation Reduction Act (IRA), signed into law August 16, 2022, might not have been the initial catalyst behind the onshoring battery factory trend. But it.

storage projects. This investment is expected to create 350,000 jobs by 2030. Through this investment, the industry is committed to supporting American battery manufacturing leadership, ensuring low-cost affordable electricity to fuel economic growth and American energy dominance. A pro-business.

The Prime Minister of Canada states that automotive and battery companies have invested nearly \$31 billion in EV manufacturing nationwide in the last four years. These ambitious projects are laying the foundation for a robust EV supply chain, solidifying Canada's role as a leader in the green.

With the new battery manufacturing complex in the southwestern state, LGES will boost its production capacity in major product segments, develop more cohesive partnerships with its customers in both EV and ESS sectors, and cut back on the logistics cost by bringing its new manufacturing facilities in.
