

Bridgetown explosion-proof solar panel manufacturer

Overview

MSM has designed this module under the strictest safety regulations, complying with all atex and IECEx standards, the panel cells are encapsulated between a tempered glass cover and an aluminium back sheet to provide maximum protection in the most extreme environmental conditions.

MSM has designed this module under the strictest safety regulations, complying with all atex and IECEx standards, the panel cells are encapsulated between a tempered glass cover and an aluminium back sheet to provide maximum protection in the most extreme environmental conditions.

These specialised solar panels are engineered to prevent becoming a source of ignition, offering reliable energy solutions in industries like oil & gas, petrochemicals, mining, and offshore platforms. In this blog, we'll explore what ATEX and IECEx certified solar panels are, why they are so.

The MSP20Ex solar module is an ATEX classified photovoltaic module for use in isolated systems where no electrical power is available, typically on offshore oil and gas platforms classified as a gas explosion risk area. MSM has designed this module under the strictest safety regulations, complying.

The JCE Energy SPP Zone 1 & Zone 2 Solar Power Pod is a compact solar power supply unit and is available in different power ratings from 24-960W with output voltages ranging from 12V – 240V AC or DC. A solar pod consists of a solar panel, to convert solar energy into electricity, a battery pack, to.

SOLAREX modules are an IECEx certified products with up to 360W power and can be used in hazardous areas of class 1 Pipeline control and management Need more information ?

CONTACT US! .

Then Straatman has the solution! Straatman has developed a sustainable autonomous solar energy solution. This high quality green power supply system with virtually no downtime, allows you to power almost any system on remote or offshore applications like: For hazardous area applications such as LNG.

All Solar Power Units are designed and built to order, RCP engineers will discuss power requirements and supply voltages with you to ensure that each Solar Power Unit is specified correctly. Environmental specifications may vary based on your particular application. *AC Solar Power Units are.
