Three solar photovoltaic parks donated by the Government of China were completed in 2024 and are already providing service with 12 MW. Photo: Periódico Ahora News related to the advances in the use of renewable energy sources (RES) for electricity generation in Cuba were reported at the Industry.

The Cabaiguán photovoltaic park, with a capacity of 21.87 MW, located in the central province of Sancti Spíritus, began operations after just over two months of installation. This is part of Cuba's national plan that calls for the construction of 55 solar parks by 2025, each with a capacity of 21.8.

The plan aims for one thousand megawatts of solar energy by 2025, but without installed batteries, which prevents meeting nighttime demand and limits its effectiveness against persistent blackouts. The Cuban government announced that it plans to incorporate one thousand megawatts (MW) of solar.

How does 6Wresearch market report help businesses in making strategic decisions?

6Wresearch actively monitors the Cuba Distributed Solar Power Generation Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook. Our.

Starting from the beginning of 2025, Cuba commissioned two solar power plants (SPPs) with the total capacity of 43.7 MW with total annual generation of 70 thousand MWh. We are talking about the Escuela de Enfermería project in Havana and Alcalde Mayor SPP in Cienfuegos province in the central part of.

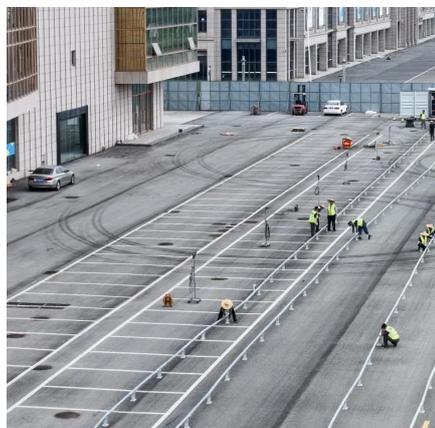

Amid a sustained energy crisis leading to widespread power outages across Cuba,

the regime has vowed to add 10,000 megawatts (MW) of solar power capacity by the end of 2025. This ambitious target was revealed by Lázaro Guerra Hernández, the Director General of Electricity at the Ministry of Energy.
