

Cote d Ivoire Wind Solar and Storage Microgrid Project

Overview

Will Côte d'Ivoire have a solar power plant?

The solar power plant is then expected to be the largest in West Africa. The further expansion of solar energy in Côte d'Ivoire will primarily be realised by private investors. The successful project in Boundiali demonstrates to them that large solar projects are technically and financially feasible in similar countries.

Why did KfW build a solar power plant in Côte d'Ivoire?

"We also endeavoured to create employment for the local population," emphasises KfW Project Manager Clara Winkler-Tomety. During the construction phase, 75% of the workers came from the region. The new solar power plant in Côte d'Ivoire is helping to achieve the goals of German development cooperation in the expansion of renewable energies.

How will Côte d'Ivoire contribute to energy transition?

Cooperation with Côte d'Ivoire is to be further intensified within a climate and development partnership. The aim is to support energy transition towards more renewable energies in the West African country and to further expand its role as a net electricity exporter to enhance security of supply in West Africa.

How will a new solar power plant benefit Côte d'Ivoire?

The clean electricity generated in this way can supply 35,000 households, benefiting around 150,000 people. The new plant will save 35,000 tonnes of greenhouse gas emissions every year - an important contribution to climate protection. The solar power plant is regarded as a model project for the expansion of solar energy in Côte d'Ivoire.

Cote d'Ivoire Wind Solar and Storage Microgrid Project

[Cote d'Ivoire Opens 200 MW Solar Bid](#)

Côte d'Ivoire launches 200 MW solar tender with 33 MWh storage, seeking private investment to boost renewable energy and grid reliability in northern regions.
