

Croatia New Energy Station Energy Storage

Overview

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Šibenik, marking a significant step in modernising the country's energy infrastructure.

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Šibenik, marking a significant step in modernising the country's energy infrastructure.

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to €16.8 million in IE-Energy Projekt, a newly established joint-stock company developing a greenfield battery energy storage system (BESS) and virtual power plant (VPP) in Šibenik, Croatia.

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Šibenik, marking a significant step in modernising the country's energy infrastructure. The €60 million investment, co-financed by the European Bank for Reconstruction and Development.

The Croatian government has allocated almost €20 million (\$23.2 million) of European Union Modernization Fund grants to help complete a 60 MW/120 MWh battery energy storage system (BESS) at an aluminum rolling mill site days after plans were revealed for a utility-scale battery storage system in.

Croatia is taking a major leap forward in its green energy transition, backed by a significant investment from the European Bank for Reconstruction and Development (EBRD) and other key partners. The project involves the construction of a sophisticated 60 MW battery energy storage system (BESS).

The European Bank for Reconstruction and Development (EBRD) has announced a direct equity investment of up to €16.8 million in IE-Energy Projekt, a newly established joint-stock company developing a greenfield battery energy storage system (BESS) and virtual power plant (VPP) in Šibenik, Croatia.

Croatia's Ministry of Environmental Protection and Green Transition has initiated the process to determine if a full environmental impact study is necessary for the proposed 99 MW Boksic solar power plant, which will include an integrated battery

energy storage system (BESS). Once operational, the.
