State and local incentives can reduce your solar costs by thousands of dollars. Why trust EnergySage?

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make informed home.

With the federal solar tax credit ending much sooner than expected — you now only have until Dec. 31, 2025, to install a system and get the 30% solar tax credit — it’s definitely in your best interest to take advantage of all the solar incentives available to you. We’re here to help you navigate.

See which programs are available in your area and learn how SolarEdge products can help you generate extra cash. How can we help you?

Incentives nationwide are offering up to thousands to homeowners with solar, EV charging and battery storage. Which programs are available for you?

Search Now.

Several local utilities and states offer incentives for businesses and property managers to install Universal Wall Connectors, often taking the form of a rebate or a tax credit. Rebates can be claimed at or after purchase, while tax credits are

claimed when filing taxes. Find state and.

SCF’s zero-cost solar financing lets you power your property with clean energy and add EV charging. No upfront investment, no maintenance, just savings and sustainability. A Commercial Solar PPA (Power Purchase Agreement) gives commercial and non-profit property owners a way to go solar with zero. Does a solar PPA offer EV charging stations?

While a PPA will almost always be cash flow positive on day one for the energy consumer, a new offering by SCF provides the option for off-takers to pay zero solar electricity costs for the entire first year of operation. Adding EV charging stations to a solar PPA agreement can further enhance the benefits of renewable energy adoption.

What is a Solar PPA agreement?

A Solar PPA (Power Purchase Agreement) is a long-term contract between a solar energy provider and a consumer for the generation of solar power. Solar PPA agreements typically offer 15-30 year terms, while the developer remains responsible for the operation and maintenance of the PV (Photovoltaic) system throughout this term.

What rebates are available for EV charging in Pasadena?

Pasadena Department of Water and Power (PDWP) is offering rebates of $3,000 per port, up to $75,000 per site address, for commercial customers to install Level 2 EV charging. Peninsula Clean Energy (PCE) is offering rebates that cover up to 75% of total project costs to install Level 2 EV charging at multifamily, workplace and business properties.

Does DNREC offer EV charging rebates?

The program is only being opened periodically. DNREC is offering rebates of $3,500 per port (up to 75% of total project costs) for multifamily properties to install Level 2 EV charging, and rebates of $2,500 per port (up to 60% of total project costs) for public access, fleet or private workplaces to install Level 2 EV charging.
