

# Does Bucharest's solar power generation need to be equipped with energy storage

## Overview

---

As Bucharest accelerates its shift toward renewable energy, new energy storage battery systems have become the backbone of this transformation. With solar and wind projects expanding rapidly, reliable storage solutions are no longer optional—they're essential.

As Bucharest accelerates its shift toward renewable energy, new energy storage battery systems have become the backbone of this transformation. With solar and wind projects expanding rapidly, reliable storage solutions are no longer optional—they're essential.

y energy storage projects in Romania. Also through the EU's Recovery and Resilience Facility and the National Recovery and Resilience Plan, SC KBK Kraft Project obtained EUR 3.9 million from the Chamber of Deputies' plenary efficiency and stability of the grid. Lithium-iron-phosphate (LiFePO<sub>4</sub>) batteries.

The Energy Policy Group (EPG), a think-tank specialized in energy and climate policies, has made some calculations related to the need for photovoltaic panels and storage facilities so that households in Bucharest can be supplied exclusively with electricity from photovoltaic sources. Bucharest.

While Romania's capital leads Eastern Europe in renewable adoption, its 19th-century grid infrastructure simply can't handle the variability. Blackouts during peak demand hours have increased 43% since 2022 according to the 2024 EU Energy Transition Report. Wait, no – modern energy storage isn't.

The National Company Bucharest Airports (CNAB) announced a major investment in a photovoltaic power plant to cover part of the energy needs of Henri Coandă International Airport (also known as Otopeni Airport) - the main airport serving the Romanian capital. The total estimated value of the project.

But here's the kicker: Bucharest is quietly becoming Europe's testing ground for energy storage harness parameters that could redefine urban power grids. With 37% of Romania's electricity already coming from renewables [5], the capital's infrastructure needs wiring solutions that can handle solar's.

Bucharest, December 29, 2025 – The Europe Today: Bucharest's main international

gateway, Henri Coandă International Airport, is set to significantly strengthen its energy self-sufficiency and environmental sustainability through a large-scale solar power investment, the National Company Bucharest.

## Does Bucharest's solar power generation need to be equipped with energy storage?

### ROMANIA: What would it take for households in Bucharest to ...

However, due to the intermittent nature of solar energy, it is essential to pair PV systems with an efficient energy storage solution. This allows excess electricity produced ...
