

# Domestic requirements for energy storage products in Hamburg Germany

## Overview

---

Do battery storage systems need a permit in Germany?

In Germany, in most cases, neither environmental nor energy industry permits are required for battery storage system alone, though it must comply with the regulation on electromagnetic fields (26. BImSchV). Battery storage systems must be registered in the market master database (Marktstammdatenregister).

What is the business model for a German energy storage system?

Therefore the business model for a German energy storage system is slightly different to business models in other markets. The key business models in Germany comprise: Improvement of reliability of electricity supply for industrial production.

How does Germany support the development of energy storage facilities?

The Federal Ministry for Economic Affairs and Energy, responsible for energy policy in Germany on the federal level, supports the development of electricity storage facilities. Under the Energy Storage Funding Initiative launched in 2012, funding for the development of energy storage systems has been provided to around 250 projects.

How many electricity storage facilities are there in Germany?

In principle, the number of electricity storage facilities, their installed power and storage capacities are recorded in the Core Energy Market Data Register kept by the Bundesnetzagentur. In Germany, there are currently some 30 pumped storage plants with a combined capacity of approx. 24 GWh and a total power of approx. 6 GW.
