Energy Storage Container is also called PCS container or battery Container. It is integrated with the full set of storage systems inside including a Fire suppression system, Module BMS, Rack, Battery unit, HVAC, DC panel, and PCS. Energy Storage Container is an energy storage battery system, which.

Disaster containers or earthquake containers are specially designed portable containers used during natural disasters, emergencies or humanitarian aid operations. These containers can be quickly set up to provide temporary accommodation for disaster victims, to meet their basic needs and to receive.

An emergency container unit serves as a key solution for temporary accommodation, relief operations, command offices, security posts, and urgent services in situations such as earthquakes, floods, or humanitarian crises. These units are designed for rapid deployment in hard-to-reach areas.

Earthquake disaster containers are specially designed, portable units that serve as

emergency shelters and support facilities in areas affected by earthquakes. Constructed with durable materials and reinforced to withstand aftershocks, these containers provide immediate shelter, medical facilities.
