

# Energy storage power supply shipment volume

## Overview

---

In the first three quarters of 2025, global ESS shipments reached 286.35 GWh, up 84.7% YoY. In 3Q25, demand expanded across multiple regions, with quarterly shipments exceeding 100 GWh for the first time.

In the first three quarters of 2025, global ESS shipments reached 286.35 GWh, up 84.7% YoY. In 3Q25, demand expanded across multiple regions, with quarterly shipments exceeding 100 GWh for the first time.

The global energy storage market grew amid turbulence in the first half of 2024. Robin Song, InfoLink Consulting's energy storage analyst, breaks down the figures. The global energy storage cell shipment stood at 114.5 GWh in the first half of 2024, of which 101.9 GWh was going to utility-scale.

InfoLink has released its global energy storage system (ESS) shipment ranking for 1Q25-3Q25, based on its energy storage supply chain database. In the first three quarters of 2025, global ESS shipments reached 286.35 GWh, up 84.7% YoY. In 3Q25, demand expanded across multiple regions, with.

The rankings are based on shipment data from InfoLink's Energy Storage Supply Chain Database. In Q1 2025, China's market showed steady growth, the U.S. market saw front-loaded shipments, and emerging markets gained momentum, driving global energy storage system shipments to a record high of 71.5.

According to SMM statistics, global shipments of energy storage battery cells saw significant year-on-year growth, reaching 334 GWh for the year. Among these, lithium iron phosphate (LFP) energy storage battery cells accounted for 317 GWh. Chinese energy storage battery companies performed.

The energy storage market has shown remarkable growth patterns in recent years, reflecting an increasing demand for efficient energy solutions. 1. Global shipment volume has escalated significantly, driven by technological advancements and growing investments in renewable energy; 2. Market dynamics.

According to statistics from ICCSINO, China domestic energy storage cell shipments will be 340Gwh in 2024, a year-on-year increase of 63.5%; global energy storage cell shipments will be 350Gwh, a year-on-year increase of 59.1%.

Data source: ICCSINO According to statistics from ICCSINO, In 2024, the.
