The small island nation of the Solomon Islands is located in the Pacific Ocean and has a population of around 600,000 people. The majority of the population lives in rural areas where there is little access to reliable electricity. One village, in particular, is located on the outskirts of the.

Consider a nation composed of nearly 1,000 islands, like the Solomon Islands, where only 12% of the population has access to the national electricity grid. For the remaining 88%, reliable power is not a matter of convenience but a foundation for education, healthcare, and economic survival. This.

It's a QUICK 10 minute phone call! COMPLETE SET UP! RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize.

Solar containers are essentially modular energy systems built into shipping container-style enclosures. Equipped with solar panels, battery banks, inverters, and power management systems, they're designed to generate, store, and distribute solar electricity—even in the most isolated environments.
