The Izolyator Group produces high-voltage AC and DC bushings for voltages up to 1200 kV, high-voltage cable accessories for voltages up to 550 kV, and in 2027 it will launch an enterprise for the production of hollow composite insulators for voltages up to 800 kV. Izolyator is an international.

KEAZ is a unique Russian full circle developer and manufacturer of electrical products: from R&D to equipment assembly and packaging, which makes KEAZ absolutely flexible and capable of satisfying any customer needs. KEAZ Group of Companies is a union of three plants that specialize in development.

Izolyator Company develops, manufactures, and provides maintenance services for 12–1200 kV AC and DC bushings. The enterprise is the only Russian plant involved in ultra-high voltage bushing development, manufacturing, and testing. Until 2007, Russian high voltage bushings were manufactured at.

The history of high-voltage bushings development in Russia is inseparably connected with Izolyator — a global leader in development and manufacture of high-voltage bushings, Russia's sole company able to design, make and test alternate and direct current bushings for ultra-high voltage classes.

A circuit breaker is a critical safety device in electrical systems, designed to protect circuits from damage caused by overloads, short circuits, or ground faults. In Russia and across the CIS region, various types of circuit breakers are used in residential, commercial, and industrial.

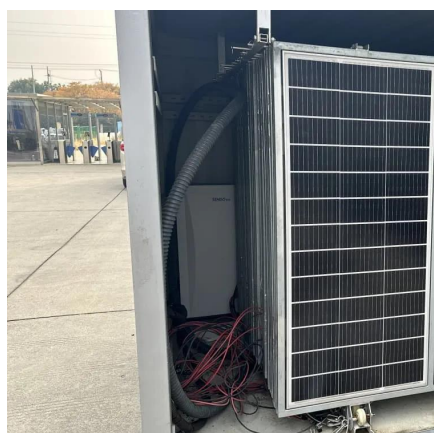

That is the largest international nongovernment and noncommercial organization in power industry. Today, Izolyator has become a research base for SC D1 RNC CIGRE Materials and Emerging Test Techniques. Cooperation with RNC CIGRE

allows us to bring Izolyator's work to a whole new level in the.
