

How much does solar panel electricity cost in Australia

Overview

As of September 2025, the average cost of a residential solar system in Australia is around \$0.88-\$0.95 per watt installed after the federal STC rebate. This means a 6kW system typically costs \$4,000-\$6,000, while a 10kW system costs \$7,500-\$10,500.

As of September 2025, the average cost of a residential solar system in Australia is around \$0.88-\$0.95 per watt installed after the federal STC rebate. This means a 6kW system typically costs \$4,000-\$6,000, while a 10kW system costs \$7,500-\$10,500.

Over the past two years, 1460 Aussies have told us what they paid for a 10 kW solar system. Over that time, the price averaged around \$10,000 fully installed, down from around \$11,000 in 2023. This is despite the solar rebate decreasing on both January 1, 2024, and January 1, 2025. Pro-tip: In our.

A commonly sized 6kW Solar PV System would cost between \$4,000 and \$6,000 in most states in Australia and a 10kW system would cost between \$7,500 and \$10,500. If you want to use top of the line products - see the premium solar system price table further down this page. So, how much does a solar.

The price of solar panel systems varies based on many factors such as location, system size, panel quality, and installation fees. In this detailed guide, we'll break down solar panel costs across different states, installation expenses, government rebates, and the long-term financial benefits of.

Solar power saves over 3.4 million Australian households \$1,600-\$2,000 annually on electricity bills at \$0.20-\$0.35/kWh, but understanding the upfront costs of a 6.6kW system (\$5,000-\$10,000) is essential for planning a smart investment. Costs vary by system size, components, location, and.

The price of solar panel systems varies based on factors such as location, system size, panel quality, and installation costs. In this detailed guide, we'll break down solar panel prices across different states, installation costs, government rebates, and the long-term financial benefits of going.

The average solar panel system in Australia costs \$3,000-\$15,000 after rebates. A

6.6kW system offers the best balance of cost and efficiency for most homes. Rebates like STCs can reduce your cost by \$3,000-\$4,000. Solar saves \$1,200-\$2,000 per year, with payback in as little as five years. Choose.
