

How much electricity does a 5g base station require every day

Overview

Today we see that a major part of energy consumption in mobile networks comes from the radio base station sites and that the consumption is stable. We can also see that even in densely deployed networks.

How much electricity does a 5g base station require every day

[5G power consumption is 2.5 to 3 times of 4G](#)

The power consumption of a 5G single station is 2.5 to 3.5 times that of a 4G single station. The increase in AAU power consumption ...

How Much Power Does a 5G Base

Station Consume? - Smart Solar

On average, a 5G base station consumes between 1,000 to 3,000 watts. This is significantly higher than 4G base stations, which typically consume 500 to 1,500 watts.
