

Hutera communication system base station

Overview

Does Hytera have a trunking cube base station?

Hytera Communications, a global leader in professional communication technologies, has once again raised the bar in the industry. On a highly anticipated November webinar, the company unveiled its latest innovation—the DMR Trunking Cube Base Station DS-6250S.

What is Hytera ds-6250s DMR trunking cube base station?

Hytera DS-6250S DMR Trunking Cube Base Station is a next-generation compact base station based on DMR Tier III protocol. With a small form factor and high integration, it is cost-effective and powerful. Built on multi-carrier and SDR technologies, one base station is expandable to 8 carriers (UHF) or 4 carriers (VHF).

What types of DMR infrastructure does Hytera offer?

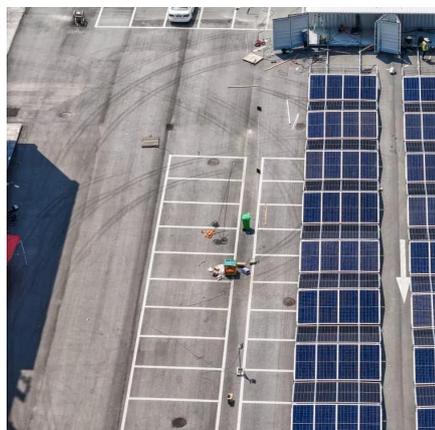

Hytera offers three series of DMR infrastructure, including DMR Trunking Pro, Lite, and Cube base stations, which are widely adopted in public safety, utilities, transportation, and various businesses across the world.

How does Hytera ds-6250s work?

Hytera has integrated multi-carrier and software-defined radio (SDR) technologies into the DS-6250S, revolutionising spectrum usage. By enabling DMR trunking simulcast, multiple base stations can share the same frequency, making it perfect for high-traffic environments like public safety, transportation hubs, and large-scale industrial operations.
