

# Indonesia 5G solar container communication station supercapacitor project details

## Overview

---

Is SEG solar building a 5GW Topcon solar plant in Indonesia?

Image: SEG Solar. Solar manufacturer SEG Solar has started construction on a 5GW TOPCon vertically integrated—from ingots to modules—solar PV plant in Indonesia. Construction started less than six months after the company unveiled its plan to build the plant in May 2024.

Does Indonesia have a 5G network?

Since its rollout in 2021, Indonesia currently ranks 9th out of 10 ASEAN countries in mobile and fixed broadband performance. The country's 5G spectrum utilisation remains limited to 1.8GHz/2.1GHz/2.3GHz while cellular operators are waiting for the government to release additional spectrums in the 700MHz, 2.6GHz, and 3.5GHz bands.

Will 5G and mobile technology accelerate industry transformation in Indonesia?

5G and Mobile Technologies to Accelerate Industry Transformation The GSMA's latest Mobile Economy Asia Pacific 2024 Report highlights Indonesia's rapid advancement in mobile technology and its substantial potential for future growth.

Will SEG solar reach 5GW by 2024?

The Houston plant Eden highlights was commissioned in August, with an annual nameplate capacity of 2GW. SEG Solar aims to reach an annual nameplate capacity of 5.5GW modules by the end of 2024. SEG Solar has started construction on a 5GW TOPCon vertically integrated – from ingots to modules – solar PV plant in Indonesia.
