

# Is the new energy storage proposed in Malawi

## Overview

---

Lilongwe, Malawi | 25th November 2024 — The Global Energy Alliance for People and Planet (GEAPP) and the Government of Malawi have officially launched the construction of a 20 MW battery energy storage system (BESS) at the Kanengo substation in Malawi's capital city, Lilongwe.

Lilongwe, Malawi | 25th November 2024 — The Global Energy Alliance for People and Planet (GEAPP) and the Government of Malawi have officially launched the construction of a 20 MW battery energy storage system (BESS) at the Kanengo substation in Malawi's capital city, Lilongwe.

The BESS project will involve the installation of a state-of-the-art energy storage system capable of storing up to 20 megawatts of electricity. This will allow ESCOM to . The Kanengo Substation, already a key hub in the country's power distribution network, will now host this state-of-the-art.

Lilongwe, Malawi | 25th November 2024 — The Global Energy Alliance for People and Planet (GEAPP) and the Government of Malawi have officially launched the construction of a 20 MW battery energy storage system (BESS) at the Kanengo substation in Malawi's capital city, Lilongwe. This is GEAPP's first.

President Lazarus Chakwera has today officially launched the Battery Energy Storage System (BESS) project by the Electricity Supply Corporation of Malawi (Escom) at Kanengo in Lilongwe. The \$20.2 million initiative, supported by the Global Energy Alliance for People and Planet (Geapp), is poised to.

Investment in the energy sector is expected to boost economic growth in Malawi, with the government committing to support the \$16 million BESS Project to meet its February 2026 completion deadline. Improved electricity reliability will be achieved through the addition of 20MW to the national.

Speaking at the launch of the Battery Energy Storage System (BESS) project in Kanengo, Lilongwe, Chakwera emphasized the importance of reliable and sustainable energy supply in accelerating development. "This project will improve security and reliability where storage during low-usage hours will.

The Global Energy Alliance for People and Planet (GEAPP), in partnership with

Malawi's government and ESCOM, has launched a \$20 million project to build the country's first Battery Energy Storage System (BESS) in Lilongwe. The initiative aims to cut carbon emissions by 10,000 tons annually while. What does Malawi's energy supply system look like?

Malawi's energy supply system consists of five components: biomass, electricity, liquid fuels and gas, coal and other renewables. These components were integrated as the basis for formulating this IEP (Integrated Energy Policy).

What are some solar energy developments in Malawi?

In Malawi, solar energy developments are helping local communities maintain sustainable energy. For instance, Bwengu Projects Malawi provides teachers in high-needs schools with solar-powered LED projectors in Bwengu, the northern countryside of Malawi.

What is the storage capacity of Malawi?

Malawi's geographical location necessitates a reasonable internal storage capacity to prevent supply disruptions due to natural or man-made emergencies. The recommended capacity for a landlocked country is at least 90 days' supply [as suggested by GoM, SADC, and the International Energy Agency].

What challenges is Malawi addressing in its energy sector?

The Government of Malawi is committed to addressing the challenges facing the energy sector while managing environment and climate change. As such, it has developed an Integrated Resource Plan to guide and facilitate investments in the sector.
