

# Islamabad solar Module Export

## Overview

---

Summary: Islamabad's photovoltaic (PV) module export sector is booming due to growing global demand for solar energy solutions. This article explores market trends, key advantages for international buyers, and data-driven insights to help businesses make informed decisions.

Summary: Islamabad's photovoltaic (PV) module export sector is booming due to growing global demand for solar energy solutions. This article explores market trends, key advantages for international buyers, and data-driven insights to help businesses make informed decisions.

Chinese solar panel imports into Pakistan in 2025 are set to exceed last year's record-breaking total, per new data from Islamabad-based think tank Renewables First. These panels have been flooding Pakistani markets in recent years as the country copes with rolling blackouts from its fossil-fuel.

The solar boom continues in Pakistan, thanks to China, which has already exported 7.5 GW panels to the country between January and March 2025, up 1 GW over last year. (Photo Credit: Renewables First) In 2024, Pakistan emerged as a surprise solar market, importing 16 GW worth of Chinese solar.

ISLAMABAD - Pakistan has emerged as a significant new market for Chinese photovoltaic (PV) companies, aligning with its path toward energy transformation. According to statistics from the China Photovoltaic Industry Association (CPIA), in the first half of 2024, Asia overtook Europe as the largest.

For Chinese photovoltaic (PV) producers, Pakistan has become a major new market that fits with its path toward energy transformation. As per the data provided by the China Photovoltaic Industry Association (CPIA), Asia surpassed Europe to become the primary destination for PV product exports in the.

Pakistan emerged as the sixth-largest solar energy market globally, demonstrating "rapid adoption" of solar power and providing valuable lessons for other emerging economies, according to a recent World Economic Forum (WEF) report. The country's shift toward renewable energy aims to mitigate the.
