

# Ivory Coast Valley Power Storage Device Supply

## Overview

---

Is Ivory Coast a reliable power supplier?

Unlike other countries in sub-Saharan Africa, the Ivory Coast is a reliable power supplier in the region, exporting electricity to neighbouring countries such as Ghana, Burkina Faso, Benin, Togo, and Mali. Ivory Coast aims to produce enough renewable energy by 2030 to reduce its greenhouse gas emissions by 28%.

What is energy in Ivory Coast?

Energy in Ivory Coast concerns the production and export of energy and electricity in the Ivory Coast. The country has a capacity of 2,200 megawatts (MW) energy production.

Is Ivory Coast a good place to invest in electricity?

Boasting the third-largest electricity system in West Africa – with an installed capacity estimated at 2,907 MW and an electrification rate of 80% – Ivory Coast is well-positioned to leverage its existing electricity system to foster robust commercial opportunities for infrastructure development.

Will Ivory Coast build a solar power plant in Tchologo?

Ivory Coast aims to increase its installed power capacity to 3.5 GW by 2025 and 8.6 GW by 2040. As part of this strategy, the country's Ministry of Mines, Petroleum and Energy signed a memorandum of understanding (MoU) with renewable energy company Kong Solaire earlier this month to construct a 50 MW solar power plant in the Tchologo region.
