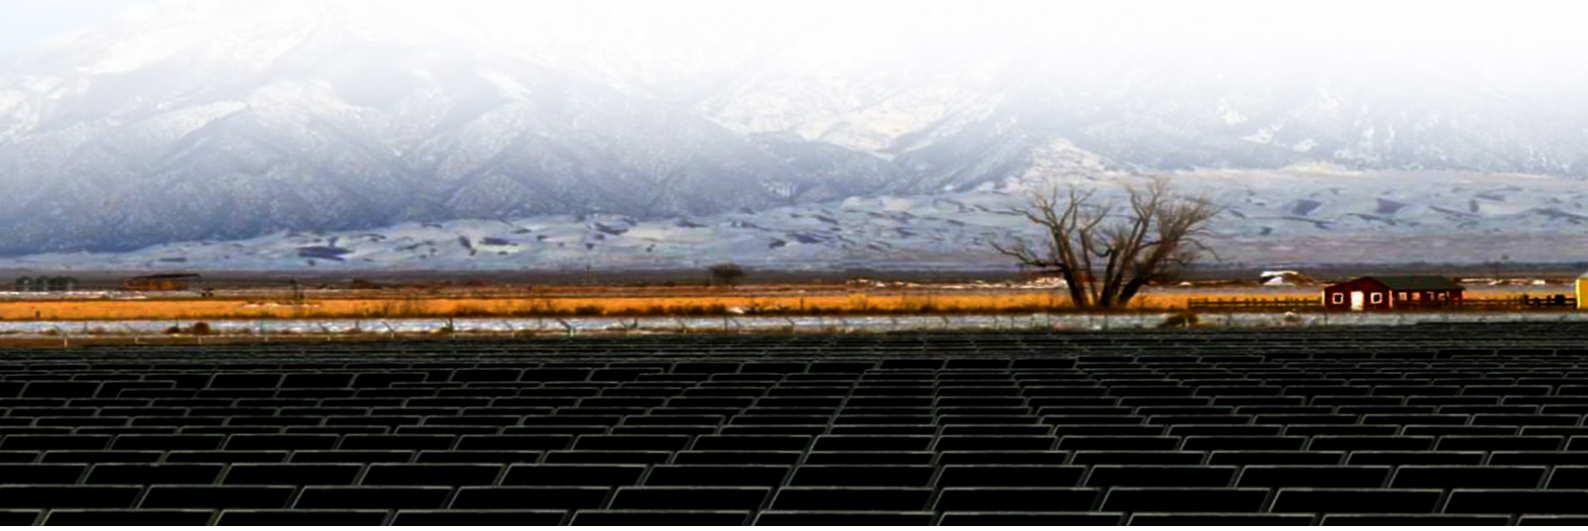
Izmir Turkey energy storage integrated charging pile



Overview

Where is Turkey's first solar power plant located?

In 2018, Turkey’s first large-scale battery plant was established in Manisa, integrated with a wind power station. During the following year, Turkey’s first grid-connected solar energy and storage facility came into operation in Konya, showcasing simultaneous solar energy generation and battery storage.

How are electricity storage facilities established?

Electricity storage facilities can be established in different ways depending on the licence types of legal entities operating in the electricity market. Storage facilities with a maximum installed capacity of 1 MW can also be established by technology development zones and industrial zones for use in their R&D activities.

Should electricity storage facilities be established by grid operators?

Electricity storage facilities to be established by grid operators – electricity storage facilities to be established by distribution companies with the approval of the Board, if they prove that they are more economical than new network investments through cost-benefit analysis and by including them in their investment plans.

Are storage activities legal in Turkey?

The first legal provision on storage activities in Turkish law was introduced with the subparagraph (e) added to Article 14 of the Electricity Market Law No 6,446 (EML) with the amendment dated 21 March 2018. With the relevant amendment, storage activities have been regulated as an activity which can generally be conducted without a licence.

Izmir Turkey energy storage integrated charging pile

Energy storage integrated charging pile

Ideal for locations with limited or no grid access, it provides reliable, flexible EV charging in logistics hubs, scenic areas, highway stops, and construction sites.
