

# Libreville High Frequency Uninterruptible Power Supply

## Overview

---

An uninterruptible power supply (UPS) or uninterruptible power source is an electrical apparatus that provides emergency power to a load when the input power source or fails. A UPS differs from an auxiliary or emergency power system or standby generator in that it will provide near-instantaneous protection from input power interruptions, by supplying energy stored in batteries.

High-frequency UPS and low-frequency UPS are designed to provide backup power during electricity disruptions, but they differ in technology, performance, and application. Let's explore the key contrasts between these two types of UPS systems:

High-frequency UPS and low-frequency UPS are designed to provide backup power during electricity disruptions, but they differ in technology, performance, and application. Let's explore the key contrasts between these two types of UPS systems:

Protect sensitive electronics and equipment during power surges and blackouts with a UPS System or Uninterruptible Power Supply from our extensive UPS lineup of standby, line-interactive, and double-conversion models. Battery backup capacities range from 350 VA to 50,000 VA. Key features include:

In today's fast-paced world, where uninterrupted power supply is crucial, Uninterruptible Power Supply (UPS) systems play a vital role in ensuring that our electronic devices and critical systems remain functional during power outages. Among the various UPS systems available, high-frequency and

Bridge the power supply gap with Infineon's total solutions for online and offline uninterruptible power supplies (UPS) systems. Factors such as the rising trend towards the internet of things (IoT) and smart buildings, a growing number of datacenters across the globe, virtualization, and cloud.

An uninterruptible power supply (UPS) or uninterruptible power source is an electrical apparatus that provides emergency power to a load when the input power source or mains power fails. A UPS differs from an auxiliary or emergency power system or standby generator in that it will provide.
