

Majuro Power Station Energy Storage Project

Overview

Why does Majuro need a new power system?

In order to stabilize power service, the Marshalls Energy Co. was forced to import more than half-a-dozen rental containerized generators last year that currently provide the backbone of Majuro's power. International donors and the Marshall Islands government have lined up to fund a huge overhaul of the power system for Majuro.

What is the Majuro power network strengthening project?

The Majuro Power Network Strengthening Project is a project that supports the Republic of the Marshall Islands' (RMI) renewable energy targets and greenhouse-gas (GHG) emissions reduction targets through investments in the Majuro distribution network.

Can solar panels improve Majuro's energy system?

Grid-connected solar panels adorn the roofs of classroom buildings at Marshall Islands High School as part of a World Bank-funded project to improve Majuro's energy system. Photo: MEC.

What fuel does Majuro use?

Majuro has a high reliance on imported petroleum fuel. Approximately 98% of its annual power generation of approximately 53.7 GWh comes from diesel.

Majuro Power Station Energy Storage Project

World Bank \$60m for MEC

The World Bank will pump \$60 million into the Marshalls Energy Company for a mix of alternative energy systems for Majuro, Ebeye and six outer islands where MEC supports power operations.
