

Manila Mobile Energy Storage Container Smart

Overview

What is Masinloc battery energy storage?

We started our venture into battery energy storage technology in 2018 when we acquired the 10 MW Masinloc Battery Energy Storage System (BESS) of the Masinloc Power Plant from AES Philippines. The Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia.

How much does a battery energy storage system cost?

Larger facilities with higher energy demands will require more extensive and costly systems. Battery energy storage systems using lithium-ion technology have an average price of US\$393 per kWh to US\$581 per kWh. While production costs of lithium-ion batteries are decreasing, the upfront capital costs can be substantial for commercial applications.

Is energy storage a good investment?

Energy storage systems involve the integration of many components including batteries, fire detection equipment, controllers, inverters, and more – all packed inside an enclosure. While the initial investment may seem significant, it's essential to consider the long-term savings and benefits that BESS can bring to your business
