

# Morocco Casablanca Electric Vanadium solar container battery

## Overview

---

Why should Morocco invest in lithium & electric batteries?

Thanks to its natural resources, advantageous geographical position and strategic partnerships with global players, Morocco aims to become a regional hub for sustainable technologies for Africa and Europe by investing heavily in the lithium and electric battery industry.

What is cobco doing in Morocco?

With the opening of a first production unit for lithium-ion battery materials in Jorf Lasfar, COBCO has begun the creation of a strategic industrial ecosystem in Morocco dedicated to electric mobility and energy storage. With a capacity equivalent to 70 GWh/year, this platform will be able to equip up to one million electric vehicles each year.

How is Morocco transforming the electric battery industry?

This success of the Moroccan automotive industry provides a solid foundation for new investments in the electric battery value chain to reach 400 billion dirhams by 2030. The country is consolidating its position as a leading player in the lithium and electric battery sector through ambitious projects with Asian and European p.

Can Morocco become a leading industrial platform in the energy transition?

As part of a strategy to make Morocco a leading industrial platform in strategic sectors related to the energy transition, the project to create a lithium refining unit, led by LG Energy Solution and Yahua, is in line with the strategy to achieve sustainable industrial development and attract high value-added investment.
