

# Namibia Solar Container Scalable Bulk Procurement

## Overview

---

How many solar PV plants are there in Namibia?

In 2018, the first twin solar PV plants in Namibia were opened in Gobabis in the Omaheke region. Ejuva One and Ejuva Two solar PV each have an installed capacity of 5 MW<sup>5</sup>. They have the capacity to feed 25.8 GWh into NamPower's grid each year.

How much solar power will Namibia and Botswana generate?

The plant, which occupies 40 hectares, is designed to supply 67.8 GWh of clean energy annually. Finally, Namibia and Botswana are in the comprehensive Regional Market Study phase of the Mega Solar initiative. The project aims to generate 300-500 MW of solar power in Namibia and Botswana.

What is Namibia's First Solar power plant?

Namibia's first solar power plant was inaugurated in 2015 through the REFiT system. InnoSun Energy Holdings opened the Omburu Solar PV Park in May with an installed capacity of 4.5 MW, generating 13,500,000 kWh a year. The Park covers 40 hectares and contains more than 33,000 panels.

How can Namibia develop a sustainable sector?

It sought to develop a sustainable sector through the state promotion of renewable energies. The white paper notably highlights hydropower, solar and wind energy as renewable sources that could enable Namibia's economic growth alongside environmental sustainability.
