

New Energy Supporting Energy Storage in Johannesburg South Africa

Overview

Under a 15-year Power Purchase Agreement (PPA) with Eskom, the Oasis projects will leverage advanced battery storage technology to store energy during off-peak periods and distribute it when demand is highest.

Under a 15-year Power Purchase Agreement (PPA) with Eskom, the Oasis projects will leverage advanced battery storage technology to store energy during off-peak periods and distribute it when demand is highest.

Johannesburg, South Africa, Nov 18, 2025 – Sungrow, a globally renowned PV inverter and energy storage system supplier, presented its latest low and medium-voltage solutions tailored for the commercial and industrial energy storage sector at the C&I Summit in Johannesburg. The event drew over 200.

In answer, South Africa has launched a series of trailblazing green projects designed to tap its abundance of renewable energy sources, including the first concentrated solar power plants in Africa, and a fiercely competitive procurement program that has helped to halve the cost of solar and wind.

Ongoing capacity shortages and load shedding have plagued South Africa for most of the past ten years, caused by declining availability of its ageing coal fleet. Load shedding is the deliberate stoppage of electrical power supply by system operators as a preventive measure to maintain system.

South Africa is at a pivotal moment in its energy transition: trying to decarbonise its economy (move away from coal) and make sure that everyone has access to reliable and affordable energy. Storage of renewable energy is very important for this transition. Solar and wind power are not available.

In a significant push towards renewable energy adoption, South Africa's Minister of Electricity and Energy, Dr. Kgosientsho Ramokgopa, wrapped up the year with a pivotal announcement during the last Energy Action Plan briefing on December 23, 2024. Unveiling the details in Tshwane, Dr. Ramokgopa.

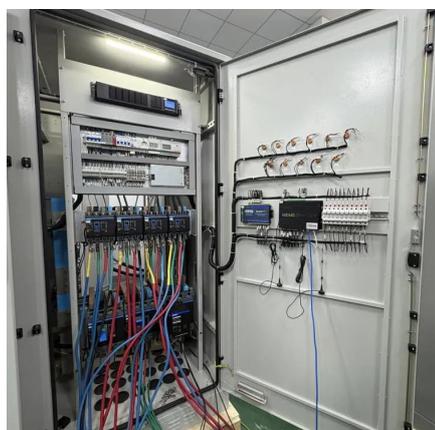

South Africa has reached a major milestone in its renewable energy transition, as three cutting-edge Battery Energy Storage System (BESS) projects, collectively known as Oasis, progress toward implementation. These projects are part of the

nation's inaugural Battery Energy Storage Independent Power.

New Energy Supporting Energy Storage in Johannesburg South Africa

South Africa Leads in Renewable Energy and Battery Storage , CIF

South Africa urgently needed over 360 megawatts (MW) of additional storage, and testing by the state-owned utility, Eskom, confirmed that grid-scale battery storage technology ...
