

New Zealand mobile power storage vehicle customization

Overview

Discover how mobile power storage vehicles are transforming New Zealand's energy landscape - and why customization is key for businesses seeking flexible, sustainable solutions.

Discover how mobile power storage vehicles are transforming New Zealand's energy landscape - and why customization is key for businesses seeking flexible, sustainable solutions.

New Zealand's leading provider of custom-designed battery storage solutions. Customized and built for -40°C to 65°C. Deepsea, high-pressure, rugged, weatherproof, and reliable. Power optimization and emergency backup for business and industry. High-performance lithium batteries for boats and EVs.

Discover how mobile power storage vehicles are transforming New Zealand's energy landscape - and why customization is key for businesses seeking flexible, sustainable solutions. With 84% of New Zealand's electricity already coming from renewable sources (Energy Efficiency & Conservation Authority).

PowerPod delivers the next generation of portable power stations - built for tradies, off-grid living, and events. With up to 6000W, 16.3kWh of lithium, our power stations pack serious power in a compact, silent, zero-emission form. Whether you're powering a remote worksite, keeping the lights on.

Our containerised energy storage solutions are available as 10ft and 20ft high cubes and stand almost 3m tall, they can be deployed all over New Zealand and further afield (we have a footprint in 90+ countries). They can be used for both commercial/industrial energy storage and domestic energy.

New Zealand's portable energy storage market grew 27% year-over-year in 2023. Let's examine the driving forces: In East Cape, solar+storage systems now provide 90% daily energy needs for 17 marae. The solution combines: Not all portable power stations are created equal. Consider these factors: Pro.

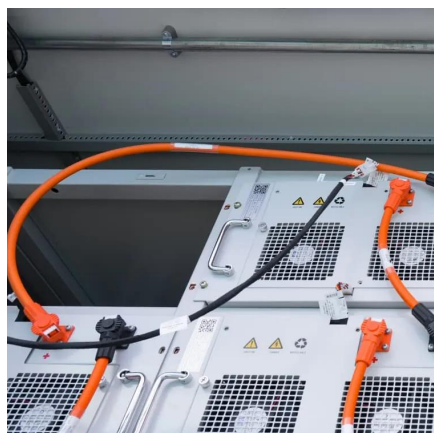

Atlas Copco's industry-leading range of Lithium-ion energy storage systems expands the spectrum of suitable applications and provides operators with increased options for power, taking modular energy storage to a new level.

Designed with sustainability in mind, these units are suitable for.
