

Notice of consultation on the installation of inverters for small solar container communication stations

Overview

How many inverters can be connected to a MV station?

The Inverter Manager and the I/O Box can be installed in the MV Station as an option and can control the output of the inverters. Up to 42 inverters can be connected to one Inverter Manager. This means that PV systems can be designed with several MV stations, whereby not every MV station has to be fitted with an Inverter Manager.

How many Sunny Tripower inverters can be connected to the MV station?

Up to 30 Sunny Tripower inverters can be connected to the MV Station. Several MV Stations can be connected together to form a ring or string on the medium-voltage side. The Inverter Manager and the I/O Box can be installed in the MV Station as an option and can control the output of the inverters.

How many inverters can be connected to one inverter manager?

Up to 42 inverters can be connected to one Inverter Manager. This means that PV systems can be designed with several MV stations, whereby not every MV station has to be fitted with an Inverter Manager. The AC low-voltage cables from the inverters are connected in the low-voltage compartment.

Can a containerized Solar System be installed off-grid?

Off-Grid Installer have the answer with a containerized solar system from 3 kw up wards. Systems are fitted in new fully fitted containers either 20 or 40 foot depending on the size required.
