

Off-grid solar-powered containers used for bidirectional charging on oil platforms

Overview

Abstract – This paper presents a case study for a recent Company approved offshore oil and gas development project aims to install 19 platforms with off-grid photovoltaic (PV) and battery systems for economic and decarbonization purposes.

Abstract – This paper presents a case study for a recent Company approved offshore oil and gas development project aims to install 19 platforms with off-grid photovoltaic (PV) and battery systems for economic and decarbonization purposes.

MOBIPower containers are purpose-built for projects where energy demands go beyond what a trailer can deliver. These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells — with optional diesel redundancy when regulatory or client.

A bidirectional EV can receive energy (charge) from electric vehicle supply equipment (EVSE) and provide energy to an external load (discharge) when it is paired with a similarly capable EVSE. Bidirectional vehicles can provide backup power to buildings or specific loads, sometimes as part of a.

Bidirectional charging allows an electric vehicle to both charge its battery from the electrical grid and discharge energy back to the grid or another electrical system. This capability will not only enable emergency backup power for homes and businesses but also allow users to alleviate grid.

Solar energy containers encapsulate cutting-edge technology designed to capture and convert sunlight into usable electricity, particularly in remote or off-grid locations. Comprising solar panels, batteries, inverters, and monitoring systems, these containers offer a self-sustaining power solution.

Bidirectional charging allows an electric vehicle not only to draw energy from the utility grid but also to feed surplus power back into it—and even supply electricity to your home. It's common knowledge that bidirectional charging has long been hailed as a breakthrough in energy technology. But is.

RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank,

panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design.
