

Plug-in hybrid solar container outdoor power

Overview

The Solar Hybrid Box® range includes energy conversion and storage units that can be interconnected with external sources (PV, grid, power generator). This range is divided into box for small power, in 10' containers for intermediate power and 20' containers for larger.

The Solar Hybrid Box® range includes energy conversion and storage units that can be interconnected with external sources (PV, grid, power generator). This range is divided into box for small power, in 10' containers for intermediate power and 20' containers for larger.

Home » Solutions » Energy Storage Solution » Off-Grid Container Power Systems and Hybrid Solutions As global demand for stable electricity in remote areas (islands, mining sites, bases) surges, traditional diesel generators—plagued by high fuel costs (0.25–0.40/kWh) and significant carbon emissions.

AET's Hybrid Solar Container provides an integrated off-grid power solution designed specifically for challenging environments. This preconfigured system combines solar energy with hot water storage, ensuring a seamless and efficient energy source for military operations and disaster relief.

Modular, plug'n'play, solar off-grid or hybrid systems pre-configured in one or several shipping containers for quick installation. Ideal for larger mini-grids or hybrid systems, Sustain Extended™ can be developed to exactly meet the

demands of the location. Custom built solar container solutions.
