The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the integration of storage technologies into large-scale solar projects. By Paulo Lopes, in Business · 26 Aug 2025, 09:31 · 0 Comments A clear example comes from.

Portugal's Ministry of Energy has allocated €100 million to support 43 energy storage projects, scheduled for completion by the end of 2025. These projects were selected from 79 applications under the country's Recovery and Resilience Plan (RRP), with eligible projects able to receive up to €30.

PNEC 2030 establishes clear goals for scaling up renewable energy capacity. By the end of the decade, it aims to install: 20.8 GW of solar power capacity, and 12.4 GW of wind power capacity. These two sources alone will contribute more than 33 GW of intermittent renewable capacity, in addition to.

A total of 43 projects were selected from 79 applications in Portugal's 2025 energy storage procurement. This included six projects from Spain's Iberdrola, which secured nearly EUR 20 million in public funding. Portugal's Ministry of Energy has announced that it has allocated EUR 100 million.

Global energy storage platform provider Powin LLC and Galp, Portugal's leading

integrated energy company, have partnered to install a utility-scale battery energy storage system (BESS) at one of Galp's solar power plants near Alcoutim, a small village in the country's sunny southern region of the.
