

Rural solar panel manufacturers

Overview

A current list of U.S. solar panel manufacturers that produce solar panels for the traditional American residential, commercial and utility-scale markets.

A current list of U.S. solar panel manufacturers that produce solar panels for the traditional American residential, commercial and utility-scale markets.

According to the American Farmland Trust's (AFT) Farms Under Threat: 2040 analysis, there is potential that 83% of solar built by 2040 will be sited on farmland within the United States. ¹ Without intervention, this landscape-scale change could have major impacts on the future of farming and food.

Thanks in large part to the Inflation Reduction Act (IRA) of 2022, the U.S. now boasts nearly enough production capacity to meet its entire domestic solar panel demand. Here are the Top 5 U.S.-based solar panel manufacturers of 2025, based on production capacity and impact: 1. First Solar –.

Convalt Energy is restoring it, on track to become the nation's second-largest producer of advanced mono- crystalline solar panels, powering a stronger, sustainable domestic industry. Convalt began developing renewable projects across Southeast Asia and Africa. Refocusing on the U.S., we are now.

The Inflation Reduction Act (IRA) of 2022 played a key role in this transformation, offering tax credits and financial incentives to companies that manufacture solar components in the U.S. Additionally, tariffs on foreign-made solar products helped level the playing field, making American-made.

This is a current grouping of solar manufacturers in the United States that produce solar panels and their associated materials for the traditional residential, commercial and utility-scale markets. This data is collected by Solar Power World editors and will be continually updated as facilities.

The current top five USA solar panel manufacturers by peak manufacturing capacity are: American-made solar panels may not always come from American companies, but they are built by American workers. Here's more information about five of the biggest, best companies that make solar panels in the USA. Who makes solar panels in the USA?

Here's more information about five of the biggest, best companies that make solar panels in the USA. The top five solar panel manufacturers in the U.S. are First Solar, Qcells, Canadian Solar, Illuminate USA, and T1 Energy. These companies produce high-performance solar panels for residential, commercial, and utility-scale installations.

Where are solar panels made?

Until recently, most of the solar panels installed in the United States were not actually made here. Instead, they were manufactured overseas—mainly in China—where production costs were lower. However, a shift has taken place in the American solar industry over the past few years.

Who makes the most solar panels in America?

Most homeowners save around \$50,000 over 25 years Who are America's top solar manufacturers?

Ohio-based First Solar is the largest manufacturer of solar panels in the U.S., producing about 25% more panels than the next-biggest American-made brand.

What are the best solar panels for homes?

In 2025, Canadian Solar ranked #1 on the list of best solar panels for homes, further solidifying its reputation in the industry. Illuminate USA is an American company, but it operates as a joint venture between Invenergy, a U.S.-based energy company, and LONGi Solar, one of the largest solar manufacturers in China.
