

San Jose Electric Uninterruptible Power Supply Equipment

Overview

What is uninterruptible power supply (UPS)?

UPS systems are designed to protect electronic equipment from power disruptions. They provide power backup and conditioning services that prevent damage to mission-critical equipment such as servers, telecommunications, medical equipment, emergency lighting, process controls, and other essential systems.

What is ups emergency maintenance & repair?

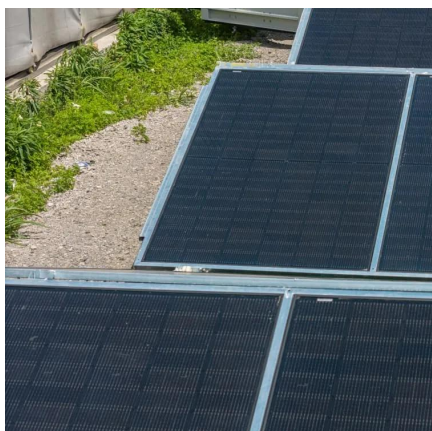

Emergency Maintenance: Emergency UPS maintenance or repair services are required in the event of an unplanned mission-critical power outage due to a system failure or other electrical distribution failure.

What is an uninterrupted PS system?

Battery Backup: Uninterrupted PS systems provide power when the Primary Source fails. The battery backup system ensures that critical equipment remains operational during times such as brownouts, blackouts, or other anomalies that could cause damage to sensitive equipment.
