

Size of solar panels installed in Poland

Overview

How big is Poland's solar capacity?

Poland's Institute for Renewable Energy says the country's combined solar capacity nearly reached 20.7 GW by the end of November 2024, putting it on track to hit 21 GW by year-end. The institute's analysis indicates utility-scale projects are driving Poland's solar expansion and will continue to do so.

How much solar power does Poland have in 2023?

Poland's cumulative installed solar PV capacity surpassed 17GW as of the end of 2023, according to the Institute for Renewable Energy (IEO), a Polish research group. By the end of December 2023, Poland's cumulative installed solar PV capacity reached 17,057MW, the highest among all renewables. Solar was followed by wind (9,428MW) and hydro (979MW).

How big is Poland's solar PV market?

(Photo Credit: TaiyangNews) Poland's solar PV market expanded by 637 MW in Q1 2025 to a cumulative of 21.9 GW, according to the latest statistics published by the Institute for Renewable Energy (IEO). The country ranked 6th among European Union (EU) nations in terms of cumulative installed capacity in 2024.

How much solar power does Poland have?

By 2020, the country had installed over 4,000 MW of solar capacity, with the number doubling by 2023. The 20,000 MW milestone achieved in October 2024 represents a significant acceleration in Poland's solar energy expansion.

Size of solar panels installed in Poland

Solar power in Poland

Solar energy accounts for about 64% of the country's total renewable energy capacity of 34.3 GW and about 30% of its total installed power capacity of 72.4 GW. More than half of this solar ...
