

# Solar Lighting Project in Burkina Faso

## Overview

---

Burkina Faso has received €17.2 million financing for a significant solar energy project in Dédougou. Funding sources include FMO's Building Prospects Fund and the African Development Bank's SEFA. This solar development is expected to boost domestic power generation and enhance grid.

Burkina Faso has received €17.2 million financing for a significant solar energy project in Dédougou. Funding sources include FMO's Building Prospects Fund and the African Development Bank's SEFA. This solar development is expected to boost domestic power generation and enhance grid.

Background: Why Burkina Faso is a key market Burkina Faso's electrification rate is among the lowest in West Africa. In rural provinces, less than 20% of households have grid access. The government and donors are pushing solar street lights as a fast, visible way to improve safety in towns.

Burkina Faso's renewable energy landscape is undergoing a transformative shift. The African Development Bank (AfDB) has approved a €6 million grant for the Dédougou solar project. This funding, provided through the Sustainable Energy Fund for Africa (SEFA), will power an 18-megawatt solar plant in.

Burkina Faso has taken a significant step toward a sustainable future by inaugurating West Africa's first solar panel factory, the Faso Energy Solar Panel Factory. This state-of-the-art facility, valued at \$50 million, will produce 200,000 solar panels annually. It is expected to enhance the.

Burkina Faso has secured €17.2 million in financing to advance a major solar project aimed at improving electricity access in one of Africa's least electrified nations. Burkina Faso has received €17.2 million financing for a significant solar energy project in Dédougou. Funding sources include.

To meet the Sahel's demanding climate, dispersed road network and long maintenance cycles, we deployed the JAGUAR All-In-Two Solar Street Light configuration with an integrated IoT platform. Remote dashboards provide live status, alarms and dimming control, while battery health and energy analytics.

Dédougou Solaire has secured €17.2 million to build and operate an 18 MWp solar

power plant in Dédougou, Burkina Faso. This funding comprises €11.2 million in debt from the Dutch development bank FMO—via its Building Prospects Fund—and a €6 million concessional package from the African Development.
