

# Solar area of China-Africa 5G solar container communication station uninterrupted power supply project

## Overview

---

Has China built a solar power plant in Africa?

Yes, China has made strides in building solar power plants in Africa. For example, China's government financed the construction of a utility-scale 50 megawatt (MW) solar plant in Kenya — the first of its kind in the country.

Does China have an Africa Solar Belt?

China's first major program under its new strategy of shifting overseas renewable energy investments toward smaller-scale initiatives is the Africa Solar Belt.

What is China-Africa Cooperation on solar resource utilization?

Through material assistance, exchanges and dialogues, joint research and capacity building, the project aims to create a demonstration zone for China-Africa cooperation on solar resource utilization, helping relevant African countries address electricity shortage, according to Li.

How much funding does the Africa Solar Belt Program aim to provide?

The Africa Solar Belt Program aims to provide CNY 100 million (around US\$14 million) in public funds between 2024 and 2027 to supply 50,000 African households with solar home systems.
