

Solar glass demand forecast

Overview

As manufacturers strive to produce more efficient solar modules, the demand for high-quality solar glass that can withstand harsh environmental conditions is on the rise. The global market for solar glass is projected to reach USD 20.9 billion by 2028, growing at a CAGR of 21.3%.

As manufacturers strive to produce more efficient solar modules, the demand for high-quality solar glass that can withstand harsh environmental conditions is on the rise. The global market for solar glass is projected to reach USD 20.9 billion by 2028, growing at a CAGR of 21.3%.

The solar glass industry is characterized by its innovation and technological advancements, which enhance the efficiency and durability of solar panels. As manufacturers strive to produce more efficient solar modules, the demand for high-quality solar glass that can withstand harsh environmental.

Global solar glass market size was forecasted to be worth USD 7.83 billion in 2024, expected to achieve USD 24.1 billion by 2033 with a CAGR of 13.3% during the forecast period. I need the full data tables, segment breakdown, and competitive landscape for detailed regional analysis and revenue.

The solar photovoltaic glass market size reached 32.10 million tons in 2025 and is forecast to reach 74.75 million tons by 2030, advancing at an 18.42% CAGR between 2025 and 2030. This sustained expansion reflects policy-driven installation targets, rapid cost deflation across the module supply.

North America is expected to witness the fastest CAGR of 30.6% over the forecast period. By type, the AR coated segment dominated the market in 2024 with a 46.5% revenue share. By technology, the perovskite module segment is anticipated to witness the fastest CAGR of 31.4% over the forecast period.

The global solar photovoltaic glass market size is valued at USD 17.09 billion in 2025 and is predicted to increase from USD 22.43 billion in 2026 to approximately USD 196.89 billion by 2034, expanding at a CAGR of 31.20% from 2025 to 2034. Asia Pacific dominated solar photovoltaic glass market in.

In 2025, the AR Coated Solar PV Glass is projected to dominate the market with a

largest share in type segment The AR Coated Solar PV Glass segment is expected to dominate the solar photovoltaic glass market with the largest share of 47.2% in 2025 due to it reduce sunlight reflected off the glass. Why is the solar PV glass market growing?

Government rules that are favorable to the development of solar PV plants is one of the factors driving the growth of the solar PV glass market. Additionally, the market for solar PV glass is growing due to the surge in demand for solar systems on a residential, commercial, and utility scale.

How big is the Solar Photovoltaic Glass market?

Image © Mordor Intelligence. Reuse requires attribution under CC BY 4.0. The solar photovoltaic glass market size reached 32.10 million tons in 2025 and is forecast to reach 74.75 million tons by 2030, advancing at an 18.42% CAGR between 2025 and 2030.

Will Solar Photovoltaic Glass market grow in 2024?

These shifts together position the solar photovoltaic glass market for resilient growth throughout the decade. By glass type, anti-reflective coatings led with a 57% solar photovoltaic glass market share in 2024, while TCO glass is projected to expand at 22.46% CAGR through 2030.

Will declining solar PV glass prices bolster global market growth?

The global solar PV glass market is characterized by several key trends that are expected to play an important role in the coming years. Declining solar PV glass prices are presumed to bolster the global market growth over the forecast period.
