

Solar lights for home use during power outage

Overview

Are solar lanterns a good choice for power outages?

There are many different styles of solar lighting available, though solar lanterns are a great choice for power outages. Essentially, however, they need to be charged ahead of time and can only be recharged during the daytime when it's bright and sunny.

Why do you need a solar lantern if the power goes out?

When the power goes out, you need a reliable source of light. LuminAID's solar lantern technology was invented for humanitarian aid and is designed to meet the specifications of disaster relief.

Can solar panels and batteries keep your home running during a power outage?

By creating your own little "island" of a home with solar panels and batteries, you can run essential appliances for days during a power outage. Read on to learn more about how to keep your home running during a power outage.

Which flashlight should I use during a power outage?

1. Flashlights Flashlights are the top choice during power outages for good reason. They're portable and provide a directed beam of light, an essential feature when navigating around your home or looking for items during an outage. Modern flashlights like the Streamlight 88040 ProTac HL can be incredibly bright and are energy-efficient.
