Our latest project in London, UK, features a cutting-edge solar panel installation, meticulously designed to enhance efficiency and promote sustainability. Leveraging advanced technology and industry-leading practices, this installation reflects our dedication to providing innovative renewable.

The Mayor of London, Sadiq Khan, is committed to increasing the amount of solar energy captured in London as part of his wider ambition for London to become a zero carbon city. The Mayor has developed the London Solar Opportunity Map with the UCL's Energy Institute and Centre for Advanced Spatial.

Ever wondered what keeps the lights on in London when half the city is binge-watching Bridgerton during a winter blackout?

Meet the unsung hero: the London energy storage system. As the UK's largest electricity consumer, London guzzles 20% of the nation's power – enough to charge 15 million Teslas.

Highview Power is a designer and developer of true long duration energy storage solutions for utilities and distributed power systems. The company's proprietary technology uses liquid air as the storage medium and its custom designed Liquid Air Energy Storage (LAES) solutions can deliver anywhere.

Solar energy has surged in popularity over the past decade, and even in a city like London, where sunshine isn't as abundant as in sunnier parts of the world, the adoption of solar power has been remarkable. This movement is driven by environmental awareness, government incentives, and.

The Mayor of London has set a target of achieving two gigawatts of installed solar

energy capacity by 2050. London lags behind the rest of the country in terms of solar energy adoption, but there is a significant opportunity for the city to increase its uptake. The Mayor has outlined a Solar Action.
