

Solar power inverter sg60kti

Overview

What is sg60kti inverter?

2 Product Description 2.1 Intended Usage SG60KTL inverter, 3-phase string inverter without transformer, is a crucial unit in the PV power system. Inverter is designed to convert the direct current power generated from the PV modules into grid-compatible AC current and feeds the AC current to the utility grid.

What are the parameters of sg60kti?

11 Appendix 11.1 Technical Data Parameters SG60KTL Input Side Data Connection to 400Vac grid Max. PV input voltage 1000V Startup voltage 620V MPP voltage range 570~950V MPP voltage range for 570~850V nominal power No. of MPPT (s) Max. number of PV strings per MPPT Max.

How does a PV inverter work?

Inverter is designed to convert the direct current power generated from the PV modules into grid-compatible AC current and feeds the AC current to the utility grid. User Manual 2 Product Description Customer can choose to connect the neutral cable or not, it's not mandatory to connect the neutral cable to the inverter.

What equipment do I need for a Sungrow inverter?

Sungrow shall hold no liability for any possible consequences caused by ignorance of this warning. Shielded twisted pair cables or Shielded twisted pair Ethernet cable. A converter such as RS485-232 converter or SolarInfo Logger is needed to convert signal between inverter and PC. Network interface is an optional function.
