

Solar power satellite factory in Croatia

Overview

The project, located in Korlat, a small settlement within the city of Benkovac in Zadar County, will be constructed by a Chinese consortium, consisting of China's Norinco International Cooperation Ltd. (Norinco International) and the Shandong Electric Power Engineering Consulting.

Croatia is expected to surpass 1 GW of solar power by 2025, driven by a significant increase in installations and supportive policies. The expansion is part of the country's broader commitment to renewable energy and aligns with EU targets to boost the share of renewables in electricity generation.

JA Solar is to supply its high-performance DeepBlue 4.0 Pro modules for the 99MW Korlat solar PV project, now under construction in Croatia. Once completed, it will be the country's largest solar power plant, marking a major step forward in its clean energy ambitions. The project is being developed.

Solar PV capacity accounted for 16.4% of total power plant installations globally in 2023, according to GlobalData, with total recorded solar pv capacity of 1,496GW. This is expected to contribute 33.7% by the end of 2030 with capacity of installations aggregating up to 4,822GW. Of the total global.

Regulatory inaction on grid fees has stalled 3.5 GW of large-scale renewables in Croatia, mostly solar, with developers such as Solvis citing a lack of stable grid-connection rules as a barrier to planning and investment. Croatia's solar market continues to grow steadily, led by the self-supply and.

Stolac in BiH is set to become home to a 125 MW solar power plant whose foundation stone was laid recently by the city's Mayor Stjepan Bošković. (Photo Credit: Grad Stolac) Chinese engineering giant China North Industries Corporation (NORINCO) is developing solar power plants in the Balkans that.
