

Somaliland Communications 5g base station main construction

Overview

5G is the fifth generation of technology and the successor to 4G. First deployed in 2019, its technical standards are developed by the 3GPP in cooperation with the ITU's IMT-2020 program. 5G networks divide coverage areas into smaller zones called cells, enabling high-speed data transmission.

Why is Telesom launching 5G & FWA services?

Telesom's commitment to technological advancement aligns with the national vision for a digitally connected and empowered Somaliland. The company believes that the introduction of 5G and FWA services will not only enrich the lives of individuals but also catalyze economic growth and innovation across various sectors.

What is Telesom 5G?

This next-generation service is set to revolutionize the way people communicate, work, and experience the digital world. Telesom customers can now access 5G data bundles on compatible 5G phones including iPhones, Google Pixel, OnePlus, and Xiaomi, with more to come including Samsung.

Who makes 5G radio & core systems?

Major suppliers of 5G radio and core systems included Altostar, Cisco Systems, Datang Telecom/Fiberhome, Ericsson, Huawei, Nokia, Qualcomm, Samsung, and ZTE. Huawei was estimated to hold about 70 percent of global 5G base stations by 2023.

Does Telesom offer 5G data bundles?

Telesom customers can now access 5G data bundles on compatible 5G phones including iPhones, Google Pixel, OnePlus, and Xiaomi, with more to come including Samsung. Additionally, the introduction of Fixed Wireless Access (FWA) service will
