Battery Energy Storage Systems (BESS) is a technology developed for storing electricity with the underlying idea being that this stored energy can be utilized at a later time. We are currently working alongside the Tonga Renewable Energy Project to construct Tonga's first ever Battery Energy.

The two battery storage facilities installed in Tonga are complementary: the aim of the first 5 MWh / 10 MW battery is to improve the electricity grid's stability (regulating the voltage and frequency), while the second 23 MWh / 7 MW battery is designed to transfer the electrical load in order to.
