

Transportation of large energy storage cabinets in Bergen Norway

Overview

Approved by the Norwegian government in 2020 and designated as a Project of Common Interest by the European Union, Northern Lights aims to reduce European industrial emissions by transporting, receiving, and permanently storing CO₂ in geological formations approximately 2,600 meters.

Approved by the Norwegian government in 2020 and designated as a Project of Common Interest by the European Union, Northern Lights aims to reduce European industrial emissions by transporting, receiving, and permanently storing CO₂ in geological formations approximately 2,600 meters.

Northern Lights is the world's first project enabling industrial companies to transport and securely store their CO₂ emissions. Approved by the Norwegian government in 2020 and designated as a Project of Common Interest by the European Union, Northern Lights aims to reduce European industrial.

Located in Norway, Northern Lights is the world's first CO₂ transport and storage project open to industry, owned equally by TotalEnergies, Equinor and Shell. Operational since 2024, the first phase of the project can store up to 1.5 million tonnes of CO₂ per year. From 2028, the second phase of.

The Norwegian government has made room in its 2025 budget for a multimillion-dollar investment destined to be injected into its carbon capture and storage (CCS) project, described as a full-scale CO₂ capture, transport, and storage development in line with the country's international climate.

The first phase capacity of 1.5 million tons of CO₂ per year is fully booked, and the joint venture owners are working to further increase the transport and storage capacity. The Norwegian Minister of Energy officially opened the Northern Lights CO₂ transport and storage facility in Øygarden, near.

The leading supplier of Energy Storage Systems for maritime, offshore Corvus Energy deploys large-scale energy storage systems (ESS) using advanced lithium-ion battery systems proven economical, safe, and reliable in a range of challenging maritime and transportation applications. As the leading.

Bergen, Norway, a hub for renewable energy innovation, is rapidly adopting

advanced energy storage battery systems to support its green transition. This article explores how battery storage solutions address Bergen's energy challenges, their applications across industries, and Bergen, Norway, a hub.
